FOR IMMEDIATE RELEASE:

Dubak Electrical Group Expands Panel Fabrication Shop to Indianapolis Office

Dubak Electrical Group (DUBAK) announced today that it will expand panel fabrication shop capabilities to its Indianapolis regional office. The Panel Fabrication shop will be located in their existing Indiana facility located at 5202 E. 24th Street Indianapolis, IN.

With this major investment DUBAK is able to grow and expand its facility and will accommodate: Junction box assemblies, motor control panels, PLC systems, DCS systems, single & multi-loop control system panels, custom fabrication panels, engineering, designing, fabrication, in-house testing, live system testing, installation & labeling, conceptual design, hardware & component specification and back panel layout and design. This enables DUBAK to serve locally the Indianapolis market and better serve their customers within the regional market.

The additional panel fabrication shop location is scheduled to start operations in mid March of this year. In a statement on the new expansion of control panel fabrication within Indianapolis, DUBAK Chief Operating Officer, Nick Dubak stated: "We are very focused on continuing to deliver upon our full capabilities to the Indianapolis market, as demand for this offering increases amongst our clients in the region."

Dubak Electrical's professional staff has the knowledge, skill, and proficiency to have designed, programmed, and commissioned state of the art process control systems for a large number of major industrial and commercial clients in the food processing, alternative fuel processing, chemical processing and multiple manufacturing processes. DUBAK is a national leader in Industrial Electrical Contracting and Turnkey Engineering, & Integration providing skilled craftsmanship, impeccable performance along with competitive pricing to customers across the nation.
